

THE HAWK

This two story family home features a master bedroom on the first floor. The open design of the kitchen, breakfast nook and family room provide a generous family living area while a separate dining room and living room provide more formal living and entertaining.

The Hawk is a very practical design with a striking exterior appearance. The optional bonus room may become a fourth bedroom or may be used as a play, exercise or recreation room.

We are continually finding ways to improve our designs. We reserve the right to change specifications without notice. Dimensions may vary from those shown. Features depicted may not be included as shown.
